Title: Setting up Android Studio, SDK, Emulator and Running the First Android Application

Aim:

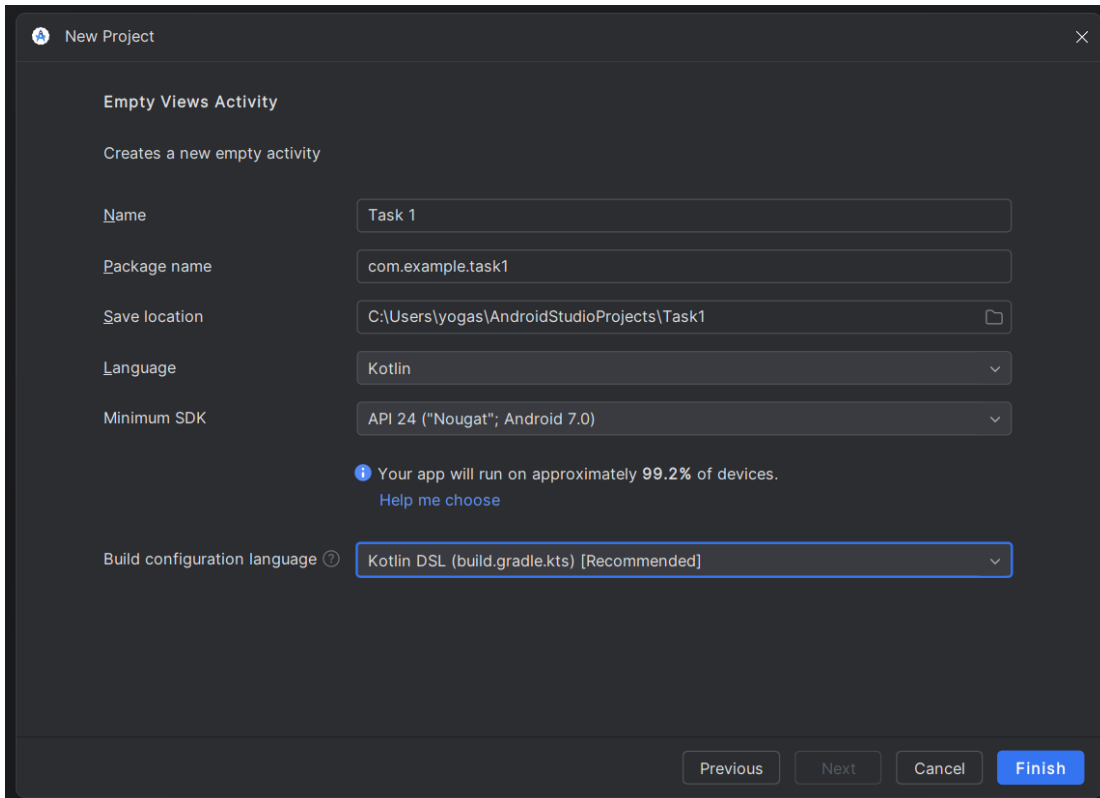

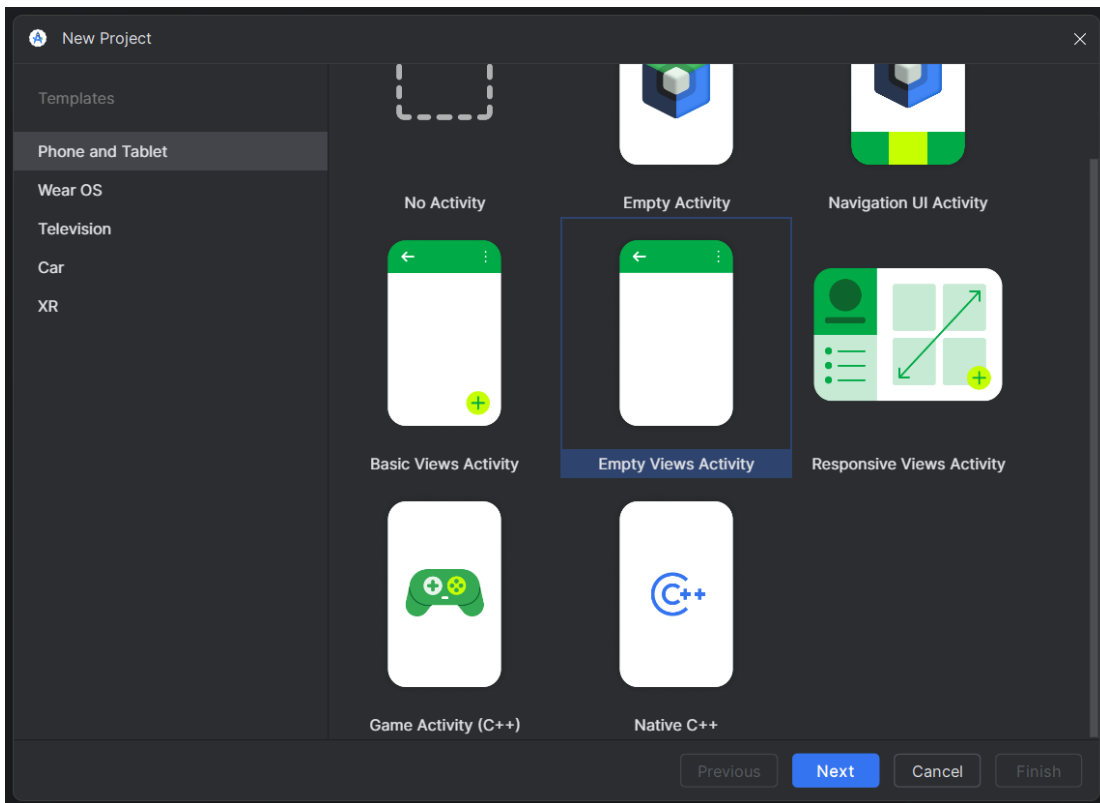

To install and configure Android Studio with SDK and Emulator, and to create and run a basic Hello World Android application.

Procedure:

1.Installation of Android Studio

2. Creating a new project

Code:*MainActivity.kt*

```

package com.example.madtask1

import android.os.Bundle
import androidx.activity.ComponentActivity
import androidx.activity.compose.setContent
import androidx.activity.enableEdgeToEdge
import androidx.compose.foundation.layout.*
import androidx.compose.material3.Scaffold
import androidx.compose.material3.Text
import androidx.compose.runtime.Composable
import androidx.compose.ui.Alignment
import androidx.compose.ui.Modifier
import androidx.compose.ui.tooling.preview.Preview
import androidx.compose.ui.unit.dp
import com.example.madtask1.ui.theme.MADTask1Theme

class MainActivity : ComponentActivity() {
    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
        enableEdgeToEdge()
        setContent {
            MADTask1Theme {
                Scaffold(modifier = Modifier.fillMaxSize()) { innerPadding ->
                    Greeting(
                        xyz = "World!",
                        name = "Yoga Shri P K",
                        rollNo = "23BCS192",
                        modifier = Modifier.padding(innerPadding)
                    )
                }
            }
        }
    }
}

@Composable
fun Greeting(
    xyz: String,

```

```

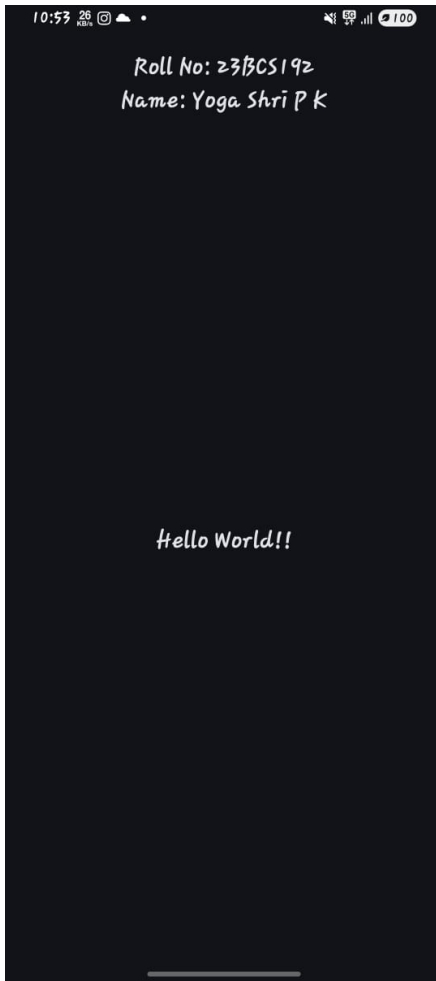

name: String,
rollNo: String,
modifier: Modifier = Modifier
) {
    Column(
        modifier = modifier.fillMaxSize()
    ) {
        Column(
            modifier = Modifier
                .fillMaxWidth()
                .padding(top = 16.dp),
            horizontalAlignment = Alignment.CenterHorizontally
        ) {
            Text(text = "Roll No: $rollNo")
            Text(text = "Name: $name")
        }

        Box(
            modifier = Modifier.fillMaxSize(),
            contentAlignment = Alignment.Center
        ) {
            Text(text = "Hello $xyz!")
        }
    }
}

@Preview(showBackground = true)
@Composable
fun GreetingPreview() {
    MADTask1Theme {
        Greeting(
            xyz = "World!",
            name = "Yoga Shri P K",
            rollNo = "23BCS192"
        )
    }
}

```

Output:

Result:

The setup of the android studio is done and “Hello World!” program is executed successfully.
